DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-18 and 22-26, drawn to a carrier comprised of two panels that displays a comestible article, classified in class 40, subclass 124.
- II. Claim 19-21, drawn to a blank comprised of three trapezoidal panels with elongated flaps on the edges, classified in class 206, subclass 45.28.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a suitable blank could involve different folds and would not necessarily require elongated flaps for carrying adhesive. The subcombination has separate utility such as a gift card that does not carry any article.
